

We make it happen.

from the design and production of preforms, molds and containers, right up to the realization of complete lines. A global service that is founded, not only on technology and quality, but on passion and creativity, and on listening to the real needs of those who want to build a plant with us: **"building systems around our customer."** SIPA is the ideal partner to harness your imagination and bring your projects to life. **From pellet to pallet!**

A UNIQUE EXPERTISE UNDER ONE SINGLE ROOF

4 manufacturing plants, **17** branch offices, **28** company operated technical service centers worldwide with local technicians, **9** mold refurbishment centers. **2nd** largest PET mold producer. **5** spare parts coordinated hubs and integrated inventories. **2,600** customer in **147** countries with more than **7,100** systems installed worldwide.

Zoppas Industries

Complete Bottling Lines

Feel free to imagine.

A range that is complete and unique on the market, combining diverse but complementary skills that provide a comprehensive view of the features of the preform and final container; from the seed of an idea, right through to its fruit in all possible applications on bottling lines. SIPA is the only supplier on the market capable of offering you a full range of skills specific to the entire process:

PACKAGING DESIGN AND ENGINEERING

1-STEP AND 2-STEP SYSTEMS

PACKAGING SOLUTIONS

CONTAINER MANUFACTURING

SIPA IS NEVER FAR AWAY

Feel free to imagine. We make it happen.

ECS - ECS SP
Integrated systems from plastic resin to the finished containers. Low, Medium and High output: from 1,000 to 36,000 bottles/hour.

XFORM
Preform Production Systems. Output from 5 to 700 million preforms/year.

XTREME
Rotary Preform Production system. Output from 20,000 to 70,000 preforms/hour.

SFR - XTRA
Rotary Blowmolders. Output from 13,000 to 54,000 bottles/hour.

SFL
Linear Blowmolders. Output from 500 to 10,800 bottles/hour.

Sincro Bloc Solutions
Sincro Bloc R (rotary) and L (linear) integrated blowing and filling/capping systems, Xtreme Sincro Cube integrated preforms production, bottle blowing and filling/capping.

Isofill
Isobaric mechanical filler suitable to fill CSD, still and carbonated water.

Stillfill EVO
Gravity mechanical filler suitable to cold fill still water and not carbonated products.

Hot Fill Solutions
Complete range of electronic and mechanical fillers for clear or pulpy products, including the integration with sacs doser for double stream applications.

Flextronic
Extremely innovative and flexible platform of electronic volumetric fillers suitable to handle to still or carbonated, clear or pulpy and hot or cold-fill products, and weight filling.

Flextronic Xfill
Innovative configuration with the integration mixer-filler: No on-board product tank for carbonated products filling, the mixing unit buffer tank is used as a product tank for the filler.

Product Preparation
Degassing and carbonation unit, blending and carbonation unit with massic control, C.I.P. unit, continuous in-line multi-components blending unit, product pasteurization unit, product carbonation unit.

COMPLETE LINES from pellet to pallet

We sell plant solutions and through engineering we achieve products that meet the production needs of our customers. The value of the product: engineering, standardization and customization.

With the engineering of a plant, the design process is rationalised through the right combination of several factors i.e.:

- The customer's production needs.
- The logistic limits of the areas destined to contain the line.
- The machines and the conveyors composing the line.
- The cost of the single components part.
- To guarantee a reduced global TCO.
- Our commitment for the respect of the environment.

We design our plants according to the "product line" concept as a single entity, and not as a simple combination of single applications. Our experience allow us defining specific standards of service quality and components (standardization).

The plants are studied and developed to meet the specific needs of each customer, in compliance with the high quality standards guaranteed by our company (engineering to customized each project).

CONTAINERS PRODUCTION

Complete range of preform and container production systems: one-stage systems from resin to finished product, injection presses for preform production, linear and rotary blow moulding machines to produce bottles. This wide range of solutions is enriched by the Sincro-Bloc, an integrated blowing-filling-capping, and the Sincro-TriBloc, an integrated blowing-labelling-filling-capping system, both available in various versions and coupled with various fillers: isobaric, gravity, volumetric and weight, suitable to fill mineral water, still and carbonated soft drinks, hot filled products (juices, tea, isotonic), edible oil and detergents.

FILLING MONOBLOCKS

Complete range of rinsing-filling-capping monoblocks for still and carbonated water, soft drinks, milk, beer, tea, fruit juices and edible oil up to 180 filling valves. Available in both mechanical and electronic version. All the monoblocks are designed to guarantee a high operating flexibility, efficiency and fast change-over operations. We put big attention to the sanification of all the filling process components. **Output from 4,000 up to 72,000 bph**

PRODUCT PREPARATION

Product preparations systems such as carbonators, traditional and automatic mixers with massic control, pasteurisers. Easy-to-use applications with high finished product qualitative standards.

PALLETIZER / DEPALLETER

Complete palletising and depalletising systems both traditional and robotic, for bottles, jars, cans, cartons, plastic crates and packs.

CARTONING SOLUTIONS

Craters for cartons and plastic crates for every kind of bottles, cans and jars. The robotic craters are particularly suitable for high speeds or, thanks to the precision and flexibility of the robot arm, for all the complex manipulations such as lay-down, crossed, up-side-down bottles cartoning and so on. The range includes carton erectors, carton sealers and partitioning inserting machines

For Mineral Water, CSD, Juices and Sensitive Products, Wine and Spirits, Milk & Dairies, Edible Oil.

Genius
Complete traditional palletising and depalletising systems, with high and low feeding.

Robby Pal - Robby Rack
Robot solutions for every kind of containers, designed upon customer's needs.

Jolly - Silent - Robby Pack
Cartoning and crating machines both traditional and robotic, able to meet different production needs.

Formex - Insert - Stick
Complete cartoning lines for carton erection and closure, also with partitions.

Uniwrap
Wrap-around cartoning machines with continuous movement. Patented system for partition insertion available upon request.

Conveyors
Conveying systems with modular elements for every kind of container.

Water
High efficiency complete lines for carbonated and non-carbonated mineral water.

CSD
Complete and very flexible lines for all kind of CSD available today on the market.

Hot Fill Products
Very flexible and integrated solutions to manage hot fill products (clear and with pulps/cells) and cold fill products (still and carbonated) in the same line.

Beer, Wine and Spirits
High efficiency and multi-options lines for beer, wine and spirits suitable to match any specific need.

Edible Oil
Complete lines for every kind of edible oil, suitable for small and big bottle sizes.

Milk and Dairies
Ultra Clean solutions for milk and dairies complying with high shel-life requests.
